

TWIST™

EXCEPTIONAL ESPRESSO

The stylish, award-winning mypressi™ TWIST™ is a revolutionary hand-held espresso maker that will change how, and where, you enjoy delicious coffee and espresso-based beverages. The TWIST is truly portable and incredibly easy to use, yet makes delicious, smooth espresso time after time.

The TWIST requires no external power to produce single or double shots from either fresh ground coffee or ESE pods. Just put in the ground coffee or pod, pour in some hot water and pull the trigger. Seconds later you can enjoy a perfect espresso extraction. Clean-up is just as easy: give the TWIST a quick rinse and you're done.

The TWIST obtains its operating pressure from the same recyclable and affordable 8g pressure cartridges that

have been safely used in whipped cream dispensers worldwide for over 80 years. Each cartridge has sufficient pressure to make up to four double shots or eight single shots of espresso. The TWIST's patent-pending engine regulates the cartridge to extract a delicious single or double-shot of espresso at the perfect pressure. The result is an ideal espresso extraction with a clean and clear taste that makes the most of every bean.

You can also use your TWIST to create the espresso for a delicious range of drinks and desserts from cappuccinos, mochas and lattes to affogatos, iced and frozen coffee drinks, espressotinis, machiattos and more. The TWIST is the must-have portable espresso maker for those seeking truly delicious espresso, anytime, anyplace.
