

## How to do the TWIST

---

The mypressi TWIST™ is the world's first ultra-portable espresso maker, with a sleek design that fits perfectly in the palm of your hand. The TWIST is also simple and convenient to use. With a little hot water it will make a perfect espresso anytime, anyplace.

### Power Up

Insert a recyclable 8gm gas cartridge—commonly used for whipped cream or soda water—into the TWIST handle to pressurize. The cartridge provides the nine bars of pressure required for an ideal espresso extraction; a single cartridge will make up to eight shots.

### Pick Your Grind of Choice

Fill the mypressi TWIST basket with fresh ground coffee or an ESE pod using the optional adaptor and place the water container on top. You're now only a few moments away from enjoying a perfectly prepared espresso.

### Just Add Water

Add hot water from any convenient source. No need to measure; simply fill the water to the marked fill line for both single and double shots.

### Seal and Go

Place the top seal onto the water container and turn to lock down. The air-tight seal prevents any leaks. You are now ready to TWIST.

### Off Like a Shot

Hold the TWIST in place over one or two cups and pull the trigger. Watch as the TWIST produces delicious espresso with perfect crema. Achieving the perfect perk took less than 30 seconds.

### Enjoy

Take a moment to appreciate the flawlessly brewed, delightfully aromatic espresso before you. Add hot frothed milk for a latte or sprinkle with cinnamon or chocolate for a perfect cappuccino. Add hot water to your espresso for a full Americano, or make your espresso directly over other drinks or desserts. Welcome to espresso heaven.

### TWIST Fast Facts:

- Debuts Fall 2009 for \$169 US, including an ESE pod adaptor, two ESE coffee pods, a tamper, starter cartridges, a drip-catching coaster and travel pouch
- Delivers a minimum of 135 psi (9 bars) of pressure for an ideal extraction
- Powered by inexpensive, 100% recyclable 8gm N<sub>2</sub>O or CO<sub>2</sub> cartridges
- A heavy-hitting lightweight, weighing in at just more than two pounds
